Notes

1-I have chosen to make the header larger in order to showcase the name, logo and specify what the company does. Also the colour scheme I have chosen showcases the luxury approach of the company.

2- The main page heading is large so when user visits the site he or she will read about the company.

3-The logo I have chosen is basic and simple yet is easy to remember just like a logo should.

4-The nav is simple in order to allow the user to access the important parts of the website.

5-The article part of the website showcases the current available holidays.

6-I have put 4 images showcasing the holidays with the hover feature, so when the user hovers over the picture he or she gets the information about the destination.

7-This part is the Latest news section.

8-Here Is the section where the user will see the latest news about holidays, the company and other news

9-This is the footer it will show the information about the site such as: contact e-mail , contact number and other.
